### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 18, 19, 23, 24, 29 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Dvorak et al.

Dvorak's Figs. 1 and 2A illustrate a random number generator and method including a pair of independent free-running oscillators (elements 110A and 110C) including a pair of inverters (inverters 202) with each of the pair of oscillators having a feedback loop (elements 202 and 140) and a delay device (inverters 202) in a feedback loop and wherein an input signal of one oscillator (110C) is connected to an output of another oscillator (110A). Dvorak's inverters are delay devices.

### ***Claim Rejections - 35 USC § 112***

3. Claims 1-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2193

In claim 1 the "wherein" phrase of the last two lines are inconsistent with lines 2-3 because when the connection called for by the whereby phrase is effected then the oscillators are not free-running. Similarly note claim 23. Claim 1, line 4; it appears that "between" should be deleted. Claim 19 lacks meaning because the delay device may be a single device. Step c of claim 25 fails to be clearly related to step b of claim 23. In claims 27 the phrase "said feedback loop switches" and "the cross gate switches" lack clear antecedent basis.

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Malzahn whose telephone number is (571) 272-3727. The examiner can normally be reached on M-Th from 7:30 to 6:00.
